Work Experience

Full Stack Developer   Aug 2022 - Present

Vish Gyana Technology Solutions l Chennai

• Modified existing software systems to enhance performance and add new features.
• Managed both back-end and front-end aspects of development process.
• Reviewed project specifications and devised solutions for use across multiple websites.
• Recommended improvements to facilitate team and project workflow.
• Assisted other developers with coding, troubleshooting and debugging.
• Produced high-quality code artifacts that conformed to standards and best practices.
• Analyzed code and corrected errors to optimize output.
• Here I worked on 6 frontend and 2 backend projects, gaining skills in development, project management, and teamwork. I adapted to various technologies and effectively communicated with clients to ensure successful project delivery.

Frontend Skills

- HTML Proficiency
- CSS Expertise
- React
- Next JS
- Ant Design (UI framework)
- Axios and React Query (API)
- Context API
- React Native with Expo

Backend Skills

- Node Js
- Express Js
- Prisma ORM
- Postgresql Database (SQL)
- MongoDB Database (NoSQL)

Projects

(1) Vittae Money (Fintech Product)

Frontend eveloper

Vittae is a fintech project where I spearheaded front-end development using React and JavaScript. This endeavor involved crafting a sophisticated user interface with a clean and modern design, achieved through the implementation of Tailwind CSS. As a Full Stack Developer, my skill set revolves around mastery in React and JavaScript, demonstrating my ability to create responsive and dynamic web applications tailored specifically for the fintech sector.

Client   : Vittae.Money

Domain : Financial Technology

Live Link : Click here to see project

Skill Set : React,Html,tailwindcss & vite

(2) Vittae Money Webview

Frontend eveloper

I developed a webview feature for the Vittae Money app independently. Using React, HTML, Tailwind CSS, Vite, Context API, and Axios, I built 75% of the app's pages as webviews. This project demonstrates my capability to manage significant tasks alone and showcases my proficiency in creating user-friendly web interfaces. I focused on integrating the webviews seamlessly into the app to enhance user experience.

Client	:	Vittae.Money
Domain	:	Financial Technology
Live Link	:	Click here to see project
Skill Set	:	React,Html,tailwindcss,vite,context api & axios

(3) Vittae Money Multiform

Frontend eveloper

I developed the Vittae Multi Form website for Vittae Money by utilizing React, HTML, Tailwind CSS, Vite, Context API, and Axios, I designed and implemented various forms to streamline user interactions. This project further showcases my proficiency in frontend development and my ability to deliver user-friendly solutions using modern web technologies.

Client	:	Vittae.Money
Domain	:	Financial Technology
Live Link	:	Click here to see project
Skill Set	:	React,Html,tailwindcss,vite,context api & axios

(4) Meenahal Static Site

Frontend Developer

I recently completed the Meenamahal project at VGTS, a party hall venue. Serving as the sole developer, I orchestrated the entire project using HTML, CSS, JS, and Tailwind CSS. This undertaking provided a platform to exhibit my skills in front-end development and design, resulting in the creation of a visually appealing and user-friendly website tailored for a party hall setting. By leveraging the latest web development technologies, I delivered a high-quality solution that precisely met VGTS's requirements, ensuring the website exceeded their expectations for an engaging and immersive online experience.

Client	:	Zing Systems
Domain	:	Information Technology
Live Link	:	Click here to see project
Skill Set	:	Html,css,java script & tailwind css

(5) Turtle Collection Dashboard

React & Node Developer

Turtle Collection Dashboard is a government project where I actively employed React and Tailwind CSS for the front-end development. Simultaneously, in the backend, I utilized Node.js with Express and PostgreSQL to establish a robust and efficient system. This collaborative approach allowed me to contribute to both the user interface's responsiveness and the backend's functionality. The Turtle Collection Dashboard stands as a testament to my proficiency in React, Tailwind CSS, Node.js, Express, and PostgreSQL, demonstrating my capability to deliver a seamlessly integrated solution for a government project.

Client	:	Guindy Govt Park
Domain	:	Zoology
Live Link	:	Click here to see project
Skill Set	:	React, tailwindcss, nodeJs, expressJs, prisma & postgresql

(6) Curium Life

Frontend Developer

Curium Life, a hospital project, was meticulously developed using HTML, CSS, and Bootstrap. As the sole developer, I crafted a responsive and visually cohesive website, prioritizing user-friendly design. HTML and CSS were employed to establish a structured layout, while Bootstrap components enhanced the overall aesthetic, ensuring a modern and consistent appearance across the site. This project underscores my proficiency in front-end development, showcasing my ability to create a tailored and effective digital presence for a hospital environment.

Client	:	Curium Life
Domain	:	Healthcare Industry
